## **Upcoming Install: Sweetbay Supermarket's Flagship Store is Saving Energy with New REMIS AMERICA, LLC Refrigeration Doors**

(TAMPA, FLORIDA) Shoppers at the Hyde Park Sweetbay will soon see a temperature change in the dairy aisle. This Tampa-based company will be retrofitting 76 feet of the multi-deck refrigeration display cases in their Hyde Park flagship store with new REMIS AMERICA, LLC energy saving glass doors.

Sweetbay Supermarket's installation will take place the week of June 22, 2009.

REMIglas insulated glass doors can reduce energy consumption up to a remarkable 60% over traditional open food cases. With these potential energy savings, retail grocery stores now recognize the opportunity to significantly lower operating costs, while reducing their carbon footprint.

Eco-friendly energy savings are only part of the story. Enclosed cases maintain a more comfortable store temperature, while providing a barrier to protect food freshness in the event of a power outage. Also, insulated glass doors maintain product integrity by keeping temperatures constant, for greater consumer satisfaction. During a recent in-store survey conducted in Northern Indiana's Martin's Super Market, shoppers perceived the food was colder and fresher with the new REMIglas doors that were installed December 2008. Some responded that the doors were "a piece of cake" to open, and provide improved product visibility which enhances the selection of foods.

REMIS AMERICA, LLC's REMIglas doors have been engineered to custom fit individual case specifications. These proven door systems are in use in over ten thousand retail stores throughout Europe, via the sister company, REMIS GmbH of Cologne, Germany.

REMIS AMERICA, LLC, is the result of a joint venture between, DEHCO, Inc., Elkhart, Indiana, and REMIS GmbH of Cologne, Germany.

Sweetbay Supermarket was launched in November 2004 in Largo and is headquartered in Tampa. Sweetbay has 104 stores in Florida.
